

# AUTHORS INDEX

## A

- ABBOTT, W. K. and R. W. COLOGGI, Effect of Foundry Variables and Composition on Microstructure and Mechanical Properties of Austenitic Ductile Iron Pressure Castings ..... 1196
- AFS Malleable Division Committee 6-G, Magnetic Particle Testing of Malleable Castings, Facts vs. fallacy ..... 1235
- AFS Sand Division Committee 8-H, Surface Finish of Castings ..... 584
- AFS Sand Division Committee 8-N, Hazards from Use of Resinous Binders ..... 253
- AFS Sand Division Committee 8-R, Malleable Iron Pinhole Defects ..... 851
- AHEARN, P. J., G. W. FORM and J. F. WALLACE, High Strength Steel Castings Mass Effect on Tensile Properties ..... 1154
- AHEARN, P. J., M. C. FLEMINGS and D. A. COLLING, Cast Steel Solidification Variables Effect on Mechanical Properties ..... 1083
- ALVAREZ, J., S. FELIU, L. LUIS and D. SIGUIN, Graphs of Flow, A new method for determining the ability of metals and alloys to flow ..... 838
- ANDERSON, J. W. and W. J. MARAMAN, Plutonium Foundry Practices ..... 1057
- ANGUS, H. T., Preliminary Draft, International Recommendations, Gray Iron Charpy Impact Test ..... 513
- AOKI, I. and T. TOTTORI, Cast Iron Improvement by Oxygen Lancing ..... 49
- ARMBRUSTER, J. C., P. AZOU and P. BASTIEN, Flowability and Viscosity ..... 400
- ARNAUD, D. and P.-J. LE THOMAS, Importance of Charge Makeup, Melting Conditions and Fluxing in Copper Alloys ..... 433
- AZOU, P., P. BASTIEN and J. C. ARMBRUSTER, Flowability and Viscosity ..... 400

## B

- BACON, H. M., Comparison of Procedures and Alloys in Plunging in Ductile Iron Production ..... 1130
- BAER, W. H., Explosive Embedment Anchor for Vessel Mooring Systems ..... 187
- BAKER, D., "Life" or "Death" for the Pattern Industry ..... 663
- BARTON, H. K., Controlling Operational Variables in Die Casting ..... 206
- BARUCH, T. R. and G. W. P. RENGSTORFF, Surface Energy Effect on Flow of Molten Metal in Thin Sections ..... 920
- BASTIEN, P., J. C. ARMBRUSTER and P. AZOU, Flowability and Viscosity ..... 400
- BEALE, J. and D. G. BRADY, Foundry Sand Additives ..... 486
- BECKIUS, K., P. FLODBERG and S. FORSLUND, Olivine Sand Use in Swedish Steel Foundries ..... 280
- BEETHAM, J. R. and S. A. TALL, Brass Die Casting ..... 43
- BINSTOCK, M. H., N. H. KATZ and E. G. KENDALL, Thorium and Thorium-Uranium Alloy Vacuum Induction Melting and Casting ..... 704
- BIRON, P. E. and L. KUTNY, New Process for Shell Sand Regenerating and Cupola Preheating ..... 317
- BJORKLUND, E., Calculating Ingate Dimensions for Gray Iron Castings ..... 193
- W. K. BOCK, Charpy Test for Steel ..... 654
- BONSACK, W., Fluid Flow in Die Casting and Effect on Quality ..... 374
- BOSSONG, R. J. and J. R. JENKINS, Core Economics ..... 1278

- BRACALE, G., Al-7 Si-0.3 Mg Alloy Simple and Complex Mold Casting Characteristics, solidification, physical and tensile properties study ..... 228
- BRADY, D. G. and J. BEALE, Foundry Sand Additives ..... 486
- BROKLOFF, J. E., L. H. VANVLACK and R. A. FLINN, Production Tests of Macroinclusion Entrapment ..... 1259
- BURKLUND, T. L. and A. H. RAUCH, Prior Structure Effect on Ductile Iron Response to Induction Hardening ..... 896

## C

- CAINE, J. B., E. H. KING and J. S. SCHUMACHER, Rammed Sand Surfaces Study ..... 120
- CALAMARI, E., Induction Furnace with Incorporated Channel ..... 1243
- CARROLL, R. J., Die Casting Automotive Trim, Some factors involved in production of hardware finish castings ..... 557
- CASCINO, A. E., D. H. WORKMAN, F. K. DONALDSON, L. D. RYAN and H. F. SCOBIE, Selling Castings Effectively ..... 1040
- CHANDLEY, G. D. and B. W. CROCKER, Gradient Cooled Molds Improve Precision Cast Steel Feeding Distance .. 845
- CHANDLEY, G. D. and R. F. HARRIS, Application of Fundamental Research to Production of Superior Steel Castings ..... 1287
- CHANDLEY, G. D. and R. F. HARRIS, High Strength Steel Castings Aluminum Nitride Embrittlement ..... 169
- CHILDS, W. J., F. A. HEISER and M. L. SLAWSKY, Factors Affecting Gas-Metal Surface Defect in Shell Molded Steel Castings ..... 1249
- CLOSE, P., Problems in Sampling and Sieve Testing Sand .. 727
- COATES, R. B. and H. J. LEYSHON, Experimental Cupola Plant Experiences ..... 25
- COCCA, M. A., Vacuum Arc and Electron Beam Melting Comparison ..... 1114
- COLLING, D. A., P. J. AHEARN and M. C. FLEMINGS, Cast Steel Solidification Variables Effect on Mechanical Properties ..... 1083
- COLOGGI, R. W. and W. K. ABBOTT, Effect of Foundry Variables and Composition on Microstructure and Mechanical Properties of Austenitic Ductile Iron Pressure Castings .. 1196
- COSTELLO, J. W., Proper Pattern and Casting Design to Control Defects ..... 773
- COWLES, R. J., Studies Leading to Elimination of Deformation and Cracking in Shell Molds and Cores during Casting ..... 993
- CROCKER, B. W. and G. D. CHANDLEY, Gradient Cooled Molds Improve Precision Cast Steel Feeding Distance .. 845

## D

- DAHLMANN, A. and K. LOEBERG, Formation of Slags in Cast Iron and Effect on Casting ..... 612
- DAKSIEWICZ, R. T., T. H. HANNA, H. W. DIETERT and A. L. GRAHAM, Moldability and Mold Control, A new approach ..... 537
- DALTON, R. F., Non-ferrous Sands—Naturally Bonded or Synthetic? ..... 749
- DAY, W. E., Copper as an Alloy in Iron Castings ..... 711
- DE LARA, G. C., H. HANF and M. JEANCOLAS, Hydrodynamics Study of Horizontal Gating Systems ..... 503
- DEPUE, L. A. and W. A. PENNINGTON, Influence of Silicon on Gun Metal Alloys ..... 632
- DE RYCKER, H., Study of Mechanism of Melting Cast Iron with Hot Gases ..... 459
- DE SV, A., Alloyed Gray Cast Iron for Machine Components, practice and recent developments in Continental Europe ..... 390

# SUBJECT INDEX

## A

- Additives, sand ..... 486
- Alloys
  - Aluminum-lithium, sand cast ..... 1267
  - Cast iron, in Great Britain ..... 562
  - Copper Manganese aluminum ..... 686
  - Feeding and structural characteristics of some typical ..... 577
  - Flow determination method ..... 838
  - Magnesium-lithium base, silicon effect ..... 909
  - Magnesium-zinc-zirconium, heat treatment ..... 385
  - Thorium-Uranium, vacuum induction melting ..... 704
  - Zinc-aluminum, fluidity ..... 573
- Aluminum
  - Die casting, and factors affecting pressure tightness ..... 641
  - Die casting, machine clamp and casting area relationship ..... 442
  - Fluidity ..... 1029
  - Mechanical properties improvement ..... 1029
  - Mold coatings effect ..... 1030
  - Solidification mode ..... 1030
  - Temperature drop in runner systems ..... 1038
  - Vibration effect on effective metal head ..... 1037
- Aluminum Alloy
  - Chill effect on properties ..... 247
  - Cooling curves ..... 236
  - Lithium, sand cast ..... 1267
  - Mechanical properties ..... 241
  - Mold casting characteristics ..... 228
- Anchor, explosive embedment, vessel mooring ..... 187
- Antimony, cast iron treated with ..... 666
- Art casting ..... 801
  - Cope surface defects ..... 802
  - Foam vaporization process ..... 801
  - Foam plastics application ..... 806
  - Metal penetration ..... 804
  - Molding techniques for large sculpture ..... 805
- Automotive
  - Pearlitic malleable connecting rod ..... 1185
  - Pearlitic malleable crankshafts ..... 1075
- Autoradiographs, cast iron ..... 1022

## B

- Binders
  - Cellulose derivatives, based on ..... 410
  - Core, properties ..... 57
  - Hot box furan core ..... 924
- Brass and Bronze
  - Charge makeup, melting conditions and fluxing importance ..... 433

## Brass and Bronze (continued)

- Chemical composition, structure and mechanical properties relationship, Cu-Al-Mn and Cu-Mn-Al ..... 102
- Composition and properties, Cu-Al-Mn and Cu-Mn-Al ..... 99
- Copper manganese aluminum alloys ..... 686
- Critical silicon content in gun metal ..... 638
- Cu-Al-Mn and Cu-Mn-Al with Ni and Fe additions ..... 97
- Die casting ..... 43
  - Advantages and disadvantages ..... 48
  - Cores and ejection ..... 46
  - Die material ..... 43
  - Die design, gravity and pressure die casting ..... 44
  - Die trimming operations ..... 48
  - Heat treatment of pressure die casting steels ..... 43
  - High strength yellow brass stress corrosion ..... 737
  - High strength yellow brass stress corrosion ..... 737
  - Kiss gating ..... 865
  - Machines for die casting ..... 47
  - Melting practice ..... 44
  - Oxidation losses ..... 434
  - Paper macking machinery castings ..... 481
  - Porosity in gun metal ..... 639
  - Propeller shaft liner castings ..... 481
  - Semi-continuous casting of large hollow cylinders ..... 480
  - Shrinkage porosity evaluation ..... 1296
  - Silicon influence on gun metal alloys ..... 632
  - Solidification shrinkage in test bars and castings ..... 1295
  - Water cooling of dies ..... 46

## C

- Carbon dioxide, sand testing under compression ..... 206
- Carbon Dioxide Molding
  - Core and mold surface finish ..... 73
  - Gassed compression strength vs. total moisture ..... 68
  - Gassing technique ..... 72
  - Gray iron casting production ..... 78
  - Heavy casting production ..... 80
  - High and low green strength mixtures ..... 71
  - Non-ferrous casting production ..... 78
  - Pattern equipment ..... 72
  - Process economies ..... 82
  - Process modifications ..... 66
  - Process of ..... 65
  - Rising technique ..... 73
  - Slag ladle production ..... 74
  - in Steel casting production ..... 73
  - Storage and bench life ..... 72

## Carbon Dioxide Molding (continued)

- Strength of chromium-magnesite mixture ..... 69
- Suitable molding techniques ..... 73
- Washes for molds and cores ..... 74
- Waste sand use ..... 71
- Casting(s)
  - Aluminum-lithium alloys ..... 1267
  - Art ..... 801
  - Dimensional control of production ..... 364
  - Feeding and structural characteristics of some alloys ..... 577
  - Flowability and viscosity ..... 400
  - Iron, copper as alloy in ..... 711
  - Knowledge is key to profits ..... 1045
  - Marketing and pricing techniques ..... 1045
  - Plutonium ..... 1071
  - Process and cost control by product-mix ..... 1101
  - Selling, effectively ..... 1040
  - Surface finish ..... 584
  - Surface finish measurements ..... 584
  - Trade association educational programs ..... 1044
  - Value analysis ..... 1046
- Cast Iron
  - Alloying elements effect ..... 391
  - Alloying element effect ..... 453
  - Alloys in Great Britain ..... 562
  - Antimony treated ..... 666
  - Automotive, successful production requirements ..... 569
  - Boron effect on first stage graphitization ..... 14
  - Boron effect on nodule number development ..... 15
  - Boron effect on second stage graphitization ..... 16
  - Bridging ..... 460
  - Calcium and aluminum content effect ..... 886
  - Calculating ingate dimensions ..... 193
  - Carbide formation factors ..... 455
  - Carbide freedom importance ..... 450
  - Carbide stabilizing elements ..... 987
  - Carbon and silicon distribution ..... 878
  - Carbon distribution coefficient ..... 986
  - Charpy impact test international recommendations ..... 513
  - Chemical analysis of various ..... 885
  - Chemical composition effect on surface tension ..... 859
  - Chilled, manufacture of ..... 54
  - Chilling tendency, inoculants effect ..... 132
  - Chill reduction ..... 890
  - Chill test results ..... 889
  - Co<sub>2</sub> process ..... 78
  - Composition change effect ..... 452
  - Cooling curve techniques for control ..... 89
  - Cooling rate effect ..... 450
  - Copper as alloy in ..... 711
  - Cupola melted ..... 814
  - Damping capacity ..... 298
  - Defining research fields ..... 449

## Cast Iron (continued)

Degree of nucleation .....	883
Direct carbon content determination .....	878
Dispersion phases role in crystallization .....	880
Ductile .....	
Austenite retention .....	902
Cerium distribution determination .....	1017
Cooling rate effect .....	267
Composition effect on mechanical properties .....	1095
Crystallography of graphite growth .....	19
Factors affecting growth of spheroidal graphite .....	18
Foundry variables effect on microstructure and properties .....	1196
Hardening process .....	906
Large castings production .....	265
Magnesium effect .....	268
Normalized .....	904
Normalized and tempered .....	905
Poisons effect in crystal growth .....	20
Procedures and alloys in plunging .....	1130
Production improvements .....	1133
Response to induction hardening .....	896
Solidification .....	975
Solidification study with electron microscope .....	963
Special treating ladle .....	1125
Spheroid branching .....	21
Surface defects elimination .....	265
Surface temperatures .....	897
Eutectic .....	
Cell boundary segregation .....	983
Cell delineation .....	982
Cell size, inoculants effect .....	137
Cell structure .....	975
Cell structure and delineation .....	973
Temperature, inoculants effect .....	137
First stage graphitization .....	259
Formation of gray and white .....	451
Formation of structure and properties .....	871
Foundry variables .....	456
Free ferrite in matrices .....	894
Grain boundary solute concentration .....	980
Graphite classification proposals .....	210
Graphite formation .....	456
Graphite form and distribution .....	882
Graphite inclusion displacement .....	876
Graphitic and eutectic structures .....	1054
Graphitizing and carbide stabilizing elements effect .....	394
Graphitization rate measurement in white .....	13
Gray, hot spot influence on feeding and rising .....	811
in Green sand molds .....	813
Green sand vs. CO <sub>2</sub> sand molds .....	815
Hardness at elevated temperatures .....	1048
High speed analysis .....	89
Hot spot effect .....	811
Hypoeutectic structure .....	876
Hysteresis phenomenon .....	874
Increased silicon effect .....	140
Inoculation and inoculants evaluation .....	882
Inoculation effect on graphite formation .....	129
Inoculation effect on silicon-free metals .....	137
Liquid alloy dissimilarity .....	873
Long solidification time effect .....	818
for Machine components .....	390
Macrostructure .....	984

## Cast Iron (continued)

Magnesium .....	
Content effect .....	861
Effect on change of surface tension .....	860
Evaporation effect .....	860
Surface tension .....	862
Treatment, European methods .....	1121
Malleable .....	
Magnetic particle testing .....	1235
Pinhole defects .....	851
Manganese effect on surface tension .....	860
Manufacture by converter .....	50
Mechanical properties .....	891
Melt additions effect on graphite form .....	941
Melting in electric arc and induction furnaces .....	785
Melting practice .....	856
Melting with hot gases .....	459
Melt nucleation .....	973
Micromanometer generators .....	857
Mold rigidity .....	456
Mold wall strength increase .....	812
Molybdenum and titanium effect on hardness .....	1053
Nickel influence on structure and properties .....	1140
Nitrogen increase effect .....	880
Nodule number normalization .....	13
Nucleation .....	452
Oxygen lancing .....	49
Austenitic malleable connecting rod .....	1185
Pearlitic malleable crankshafts .....	1073
Perfect solution laws application .....	872
Problems and progress in understanding .....	449
Properties changeability theory .....	873
Raw material influence .....	457
Reaction between melts and air .....	613
Residual elements importance .....	457
Segregation mechanism .....	978
Self welding zone, bridging origin .....	465
Silicon distribution coefficient .....	984
Silicon melting .....	875
Silicon penetration .....	879
Slag formation and effect on casting .....	612
Slag formation in melts .....	615
Slag reactions in melts .....	617
Solid metal expansion .....	812
Solute addition .....	988
Solute buildup .....	980
Strain crack reduction in white .....	915
Strength improvement .....	892
Structural imperfections and bonding in graphite .....	23
Structural sensitive properties .....	873
Structure and properties .....	176
Structure quenched from molten state .....	875
Supercooling tendency .....	864
Surface energy concept applicability .....	23
Surface tension .....	855
Temperature change effect on surface tension .....	859
Temperature variation in charge .....	464
Thermal shock effect .....	918
Titanium effect on hardness .....	1052
White .....	
Inoculation effect on graphitization .....	13
Microstructure .....	975
Nodule number influence on graphitization kinetics .....	352
Vanadium effect on graphitization kinetics .....	218

## Cast Metals

Flow cessation .....	838
Fluidity measurement .....	838
Graphs of flow .....	838
Surface energy effect on flow in thin sections .....	920

## Cast Steel

Alloy determination .....	86
Analysis for carbon and alloys .....	86
Carbon determination .....	88
Casting cooling importance .....	519
Casting cooling intensification methods .....	521
Charpy test for .....	654
Chromium determination .....	88
Chill design .....	1293
CO <sub>2</sub> process in production .....	73
Deoxidation .....	1252
Deoxidation to vacuum levels without vacuum processing .....	743
Desulfurization .....	745
Enforced cooling .....	521
Establishing speed of cooling in molds .....	519
Fixation of nitrogen .....	472
Gradient cooled molds .....	845
Gas-metal surface defect, shell molded castings .....	1249
High strength, aluminum nitride embrittlement .....	169
Hot box furan core binder evaluation .....	924
Hydrogen analysis .....	1254
Interface properties .....	1288
Macroinclusion entrapment .....	1259
Mass effect on tensile properties .....	1154
Mechanical properties .....	745
Melting .....	847
Microradiography .....	1256
Microsegregation .....	1088
Molding .....	846
Mold variables .....	1249
Molybdenum determination .....	88
Nickel determination .....	87
Nitrogen in .....	469
Outer chills application with controlled heat removal .....	529
Oxygen residuals .....	744
Production, with mold cooling process regulation .....	518
Quality testing enforced cooling castings .....	526
Research application to production of superior .....	1287
Shakeout permissible temperature determination .....	519
Shell additives and substitutes .....	1251
Solidification variables effect on mechanical properties .....	1083
Thermal gradient establishment .....	847

## Charpy Impact Test

Cast steel .....	654
International recommendations for gray iron .....	513
Service condition vs. .....	656
Stress state effect .....	656
Temperature effect .....	655

## Coatings, mold and crucible, plutonium casting

plutonium casting .....	1065
-------------------------	------

## Copper-Base Alloys

Brass kiss gating .....	865
Cracking of .....	741
Iron castings, alloy in .....	711
Brass die casting .....	43
Charge makeup, melting conditions and fluxing importance .....	433
Cu-Al-Mn and Cu-Mn-Al with Ni and Fe additions .....	97

## Copper-Base Alloys (continued)

High strength copper	
manganese aluminum	686
semi-continuous casting of	
large hollow cylinders	480
Silicon influence on gun metal	632
Solidification shrinkage in test bars	
and castings	1295
Yellow brass, stress corrosion	
susceptibility	737

## Core

Binders for	58
Binders, gas evolution	63
Binders, hot box furan	924
Binder, properties	57
Boxes	1284
Dried, handling	1280
Economics	1278
Hot strength and collapsibility	61
Materials and methods	1283
Ovens	1279
Ovens, movement through	1279
Production equipment	1282
Shooter advantages	1282

## Cost

and Casting process control	
by product-mix	1101
Labor, determination by	
multiple regression analysis	164
Reduction by shell molding,	
automotive	555

## Crucible

Graphite, aluminum-lithium	
alloy melting	1268
Graphite, thorium and thorium-	
uranium alloy melting	704
Plutonium melting	1058

## Cupola

Blast rates	26
Coke layer addition	535
Coke size effect on performance	28
Combustion thermodynamics	535
Experimental plant experiences	25
Gas fired, design	531
Graphite injection through tuyeres	34
Hot blast oxygen enrichment	30
Mean coke size estimation	36
Operation with coke bed	534
Operation with refractory bed	535
Optimum blowing rate	28
Plant design	25
Preheating process	317
Tapping temperature	34
Tuyere size effect on performance	26
21 in., research in	28

## D

## Defects

Erosion and gas scab	160
Expansion scab	159
Rattail	158

## Design, product

	569
--	-----

## Die Casting

Aluminum, and factors affecting	
pressure tightness	641
Automotive trim	557
Brass	43
Casting defects cause and correction	560
Cavity filling characteristics	560
Clamp vs. load	447
Cold shuts and oxide films	643
Controlling operational variables	206

## Die Casting (continued)

Critical toggle position	824
Defects present in aluminum	642
Die engineering	309
Die lubrication	560
Elastic limit	823
Equilibrium	824
Fluid flow and effect on quality	374
Gating and metal flow patterns	
in pressure	929
Gating system	375
Inclusions and dross	645
Injection force increase	826
Injection rate and die temperature	559
Leakage, defect identification with	642
Machine clamp and casting area	
relationship	442
Machines for	315
Magnesium, equipment and metal	
preparation	723
Mechanical properties	375
Mechanics and hydraulics of die	
locking and metal injection	822
Metal composition and temperature	558
Metal Injection	307
Mold injection speed	376
Overflows	378
Process control	558
Production design, automotive trim	557
Shrinkage	646
Stresses	313
Theoretical vs. actual load	444
Velocity and pressure	828

## Ductile Iron

(see also cast iron)

Austenite retention	902
Cerium distribution determination	1017
Chromium, nickel and silicon	
influence	1096
Composition effect on mechanical	
properties	1095
Cooling curve shape	966
Crystallography of graphite growth	19
Foundry variables effect on micro-	
structure and mechanical	
properties	1196
Graphite classification proposals	210
Graphite formation relationship	
to cooling curves	966
Hardening process	906
Heat treatment effect on	
mechanical properties	1099
Heat treatment effect on	
mechanical properties	1099
Large castings production	265
Magnesium treatment, European	
methods	1121
Manganese effect	1097
Normalized	904
Normalized and tempered	905
Plunging to produce	1135
Poisons effect in crystal growth	20
Prior structure effect on induction	
hardening response	896
Procedures and alloys in plunging	1130
Production improvements	1133
Section size effect	1098
Section size and cooling rate effect	1201
Solidification study using electron	
microscope	963
Special treating ladle for	1125
Spheroidal graphite, factors	
affecting growth	18
Spheroid branching	21
Structural imperfections and	
bonding in graphite	23
Surface energy concept applicability	23
Surface temperatures	897

## E

Economics, core	1278
Education	
Foundry craft training center	
in Great Britain	1108
Techniques to improve quality	
and productivity	780
Electric arc, cast iron melting	785
Embrittlement, aluminum nitride,	
cast steel	169
Engineering	
Pattern	570
Production	572
Equipment	
Core production	1282
Induction furnace with incor-	
porated channel	1243
Specifying, understanding and	
maintaining controls	1161

## F

## Foundry

Binders based on cellulose	
derivatives	410
Craft training center in	
Great Britain	1108
Control methods, gray cast iron	89
Controls	572
New methods and materials	
bring new liabilities	768
Plutonium practices	1057
Statistical study of practice	659
Statistical techniques for	
experiments	951
Steel, olivine sand use in Swedish	280
Technical and management	
opportunities	968
Training in Danish industry	223
Urethane elastomers in	679

## Furnace

Acid induction, cast steel melting	170
Coreless induction with steel pot,	
magnesium die casting metal	
preparation	724
Cupola, hot blast, acid lined,	
cast iron melting	883
Electric arc and induction,	
cast iron melting	785
Electric, cast iron melting	856
Electrical crucible, aluminum	
alloy melting	233
Experimental, cast iron melting	459
Gas fired, aluminum-lithium	
alloy melting	1268
Gas fired pit, manganese-nickel-	
aluminum melting	190
High vacuum plutonium melting	1057
Indirect arc, neutral lined,	
ductile iron melting	1095
Induction, cast iron melting	1018
Induction, cast steel melting	847
Induction, with incorporated	
channel	1243
Magnesia lines, cast steel melting	1084
Open pot, magnesium die casting	
metal preparation	723
Reverberatory, evaluation,	
for die casting	724
Steel crucible, magnesium-lithium	
alloy melting	909
Tilting crucible, magnesium die	
casting metal preparation	724

## Furnace (continued)

Vacuum arc and electron beam melting comparison .....	1114
Vacuum arc, cast iron melting .....	130
Vacuum induction, thorium and thorium-uranium alloy melting .....	704

## G

Gates and Gating	
Brass, kiss .....	865
Hydrodynamics study of horizontal systems .....	503
Runner cross-sectional area reduction calculation .....	511
Graphite, formation, inoculation effect, cast iron .....	129
Gray Iron	
(see also cast iron)	
Alloyed, for machine components ..	390
Automotive, successful production requirements .....	569
Calculating ingate dimensions .....	193
Charpy Impact Test international recommendations .....	513
CO <sub>2</sub> process .....	78
Cooling curve techniques for control .....	89
Formation .....	451
Graphite classification proposals ..	210
Hot spot influence on feeding and rising .....	811
Inoculation and inoculants evaluation .....	882
Inoculation effect on graphite formation .....	129
Nickel influence on structure and properties .....	1140
Grinding, a day's work for a day's pay with a work meter .....	795

## H-I

Heat Stress	
Climatic conditions effect .....	673
Measurement in working conditions ..	673
Industrial Engineering	
Multiple Regression Analysis for labor cost determination .....	164
Statistical study of foundry practice ..	659
Inoculation	
Effect on graphite formation .....	129

## K-L

Kiss Gating	
Brass castings .....	865
Technique investigation .....	866
Ladle	
Drying .....	1218
Practice and refractories .....	1210
Refractory mixtures .....	1219

## M

Macrostructures	
Aluminum alloy .....	244
Cast iron .....	887, 984
Cast steel .....	1159
Magnesium, die casting equipment and metal preparation .....	723

## Magnesium Alloys

Grain size determination as related to cooling rates and section size, investment cast .....	1232
Hardness and microstructure .....	385
Heat treatment .....	385
Investment cast zirconium-bearing ..	1229
Lithium, silicon effect .....	909
Molding, melting and casting .....	1229
Room temperature tensile properties, investment cast .....	1231

Magnesium-lithium base alloys, silicon effect .....	909
---	-----

## Magnetic Particle Testing

Glossary of terms .....	1241
Malleable iron castings .....	1235
Variables involved .....	1235

## Malleable Iron

(see also Cast Iron)

Magnetic particle testing .....	1235
Melt additions effects on graphite form .....	941
Pinhole defects .....	851
White, inoculation effect on graphitization .....	13

## Melting

Aluminum alloy .....	233
Aluminum-lithium alloys .....	1268
Brass and bronze .....	190
Cast iron .....	130, 459, 785, 814, 856, 883, 1018
Ductile iron .....	1095
Cast steel .....	170, 847, 1084
Magnesium-lithium base alloys ..	909
Plutonium .....	1057
Thorium and thorium-uranium alloys .....	704

Microradiograph, cast steel .....	1256
-----------------------------------	------

## Microstructures

Aluminum alloy .....	246
Brass and bronze .....	636
Cast iron .....	134, 271, 351, 398, 458, 617, 668, 718, 888, 904, 943, 964, 975, 1022, 1053, 1199
Cast steel .....	474, 746, 1088, 1260
Copper manganese aluminum alloys .....	698
Cu-Al-Mn and Cu-Mn-Al with Ni and Fe additions .....	108
Die castings .....	377
Magnesium-lithium alloys .....	913
Magnesium-zinc-zirconium alloy ..	386
Thorium and thorium-uranium alloys .....	710

## Molding Sand

(see also Sand)

Additives .....	486
the CO <sub>2</sub> process .....	65
Green, scabbing tendency testing by shock, heating .....	152
Micromeritics applied to .....	37
Moldability and mold control .....	537
Non-ferrous .....	749
Rammed surfaces study .....	120

## Molds and Molding

Aluminum-lithium alloys, sand cast .....	1267
Dryer, gas fired .....	1214
Green sand, sinks and shrinkage ..	818
Green sand vs. CO <sub>2</sub> sand .....	815
Moisture loss effect .....	817
Plaster, mixing time and burnout shrink relationship .....	118

## Molds and Molding (continued)

Plaster, parameters effect on physical properties .....	115
Plaster, slurry temperature effect ..	118
Plutonium casting .....	1061
Sand, moldability control .....	537
Steel casting, risering technique, CO <sub>2</sub> process .....	73

## N-O-P

Nondestructive testing, magnetic particle, malleable castings .....	1235
Olivine sand, combined moisture ..	648
Patternmaking .....	571
Casting design and, to control defects .....	773
CO <sub>2</sub> molding equipment .....	72
"Life" or "Death" for the industry ..	663
Plastic equipment .....	502
Urethane elastomers .....	679
What to expect from .....	500
Permanent Mold Casting .....	257
Plutonium, foundry practices .....	1057
Pressure tightness, factors affecting in aluminum die casting .....	641
Preventive Maintenance	
Details common to all systems .....	1222
Mechanical scheduling system .....	1226
Punched card mechanized scheduling system .....	1228
Visual scheduling board system .....	1224
You can build your own system .....	1221
Production control, management techniques and .....	428

## Q-R

Quality Control	
Shell molding automotive parts ..	552
Statistical techniques for experiments .....	951
Radiographs	
Aluminum alloy .....	238
Brass and bronze .....	636
Cast steel .....	849
Refractory	
Ladle, mixtures .....	1219
and Ladle practice .....	1210
for Magnesium service .....	726

## S

Safety and Health	
Hazards from use of resinous binders .....	253
New methods and materials bring new liabilities .....	768
Sand	
Additives .....	486
AFS Gfn calculation .....	40
Angularity calculation methods ..	38
Aqueous Clay paste shear strength ..	488
Bentonite content effect on erosion ..	124
Binders based on cellulose derivatives .....	410
Blending base .....	753
Carbon dioxide-sodium silicate testing .....	206
Casting surface finish measurements ..	584

## Sand (continued)

Casting weight vs. mold strength ..	545
Clay type effect on expansion cracking ..	833
The CO <sub>2</sub> process ..	65
CO <sub>2</sub> process modifications ..	66
Compositions and properties of sodium silicate mixtures ..	70
Design and control ..	321
Diameter calculation method ..	37
Dilute clay suspension flocculation ..	488
Dry strength hot deformation ..	834
Erosion, factors affecting ..	120
Free and confined evaporation ..	5
Gassed compression strength vs. moisture content, CO <sub>2</sub> molding ..	68
Gassing technique, CO <sub>2</sub> molding ..	72
Grain fineness effect ..	343
Grain fineness of oil bonded, effect on casting surface finish ..	591
Green, dilatometer temperature effect on expansion ..	832
Green, expansion cracking ..	830
Green, hot deformation ..	829
Green, scabbing tendency testing by shock heating ..	152
High and low green strength mixtures, CO <sub>2</sub> molding ..	71
Hot deformation ..	833
Increasing clay content effect on water evaporation ..	5
Increasing compaction effect on free water evaporation ..	7
Increasing water content effect on free water evaporation ..	6
Ladle height above sprue effect on erosion ..	124
Microdensity ..	121
Micromeritics applied to ..	37
Moldability and mold control ..	537
Moldability as affected by additives ..	540
Moldability relationship to false voids ..	538
Moldability relationship to rammability ..	539
Mold atmosphere effect ..	127
Mold qualities ..	541
Mold quality and casting quality relationship ..	545
Molding techniques, CO <sub>2</sub> process ..	73
Mold static shock evaporation ..	3
Mold water evaporation by radiation and conductance ..	1
Movement and compaction ..	487

## Sand (continued)

Nominal diameter calculations ..	39
Non-ferrous ..	749
Nonmetallics sources ..	120
Oil bonded green molding ..	758
Olivine, combined moisture ..	648
Olivine, use in Swedish steel foundries ..	280
Pattern equipment for CO <sub>2</sub> molding ..	72
Permeability effect on free water evaporation ..	7
Problems in sampling and sieve testing ..	727
Rammed surfaces study ..	120
Ramming effect on erosion ..	124
Shell, regenerating process ..	317
Shot blasting effect on casting surface finish ..	605
Silica flour effect on properties of various ..	322
Sprue diameter effect ..	122
Stability relationships in soil mechanics and core slumping ..	383
Statistical analysis of sampling methods ..	733
Storage and bench life, CO <sub>2</sub> ..	72
Surface sintering ..	125
Temper moisture content effect on water evaporation ..	5
Thermal expansion of green ..	829
Volume expansion ..	836
Waste sand use, CO <sub>2</sub> molding ..	71
Water content and ramming energy effect on properties ..	323
<b>Sand Mold</b>	
Green and dry, water evaporation by heat and conductance ..	1
Static shock evaporation ..	3
<b>Shell Molding</b>	
Automotive parts ..	548
Deformation and cracking elimination ..	993
Layout and equipment ..	549
Coordinated control ..	550
Cost reduction, automotive ..	555
Quality control ..	552
<b>Solidification, theory and method for following its progress ..</b>	<b>622</b>
<b>Steel Castings</b>	
(see also Cast Steel)	
Aluminum nitride embrittlement ..	169

## Steel Castings (continued)

Analysis for carbon and alloys ..	86
Charpy test for ..	654
Deoxidation to vacuum levels without vacuum processing ..	743
Gradient cooled molds ..	845
Hot box furan core binder evaluation ..	924
Macroinclusion entrapment ..	1259
Mass effect on tensile properties ..	1154
Nitrogen in ..	469
Production with regulation of mold cooling process ..	518
Research application to production of superior ..	1287
Shell molded, gas-metal surface defect ..	1249
Solidification variables effect on mechanical properties ..	1083

## T-U

Training, Danish foundry industry ..	223
Thorium and thorium-uranium alloys, vacuum induction melting ..	704
<b>Urethane Elastomers</b>	
Industry applications ..	681
in Foundry ..	679
Properties ..	680

## W-Z

Water evaporation, sand mold, by heat radiation and conductance ..	1
<b>White Iron</b>	
(see also Cast Iron)	
Formation ..	451
Inoculation effect on graphitization ..	13
Nodule number effect on graphitization kinetics ..	352
Strain crack reduction ..	915
Vanadium effect on graphitization kinetics ..	218
<b>Zinc, aluminum alloy, fluidity ..</b>	<b>573</b>
<b>Zirconium bearing, magnesium-base alloys, investment cast ..</b>	<b>1229</b>
